

As a citizen of the State of Indiana, I wish to protest proceeding 02-278. At the risk of sounding like an anarchist, one of the best pieces of legislation to be enacted in Indiana in the last decade is our State's Do Not Call law. It works. It serves the people and its value is appreciated. I, my family, peers and most that I talk with are enormously satisfied with the effectiveness of Indiana's law. If this FCC proceeding meddles with the Indiana law, it will severely diminish or cripple what we enjoy. Preempting it from the federal law is neither necessary nor welcomed. One would hope that citizen wishes carry some importance in influencing this proceeding. I am against the preemption of this law as are the thousands of individuals in the State of Indiana enjoying peace and quiet afforded us. You need only to respect the numbers opting in to Indiana's no-call list to understand why it is important to all of us.

I appreciate your attention to this message and hope that you seriously consider its reasoning on behalf of the citizens of the State of Indiana. Thank you.
